Message from the Executive Director

The Canadian Association of Schools of Nursing (CASN) is pleased to present *Registered Nurses Education in Canada Statistics, 2022–2023 — Registered Nurse Workforce, Canadian Production: Potential New Supply*.

This annual report supports health human resources planning in both the nursing service and nursing education sectors. It represents the fruit of a strong partnership among national and provincial and territorial bodies and effective collaborative relationships with multiple partners.

The report provides data and statistical analysis of

- the number of pre-licensure graduates eligible to apply for initial licensure/registration and enter the registered nurse (RN) workforce;
- the number of RNs obtaining graduate qualifications;
- the number of nurse practitioner (NP) graduates;
- innovations in nursing education program access and delivery;
- the composition of faculty delivering nursing education; and
- faculty retention and recruitment.

We extend our sincere thanks to the contributing faculty and staff of the schools of nursing for their effort, commitment, and collaboration. Without their annual support, this collection could not exist. We would also like to thank CASN members and the College of Nurses of Ontario, who contributed to question testing, and the Ordre des infirmières et infirmiers du Québec, which provided additional data for Quebec.

We look forward to hearing your comments about the report.

Yours sincerely,

Jean Daniel Jacob
Executive Director
Canadian Association of Schools of Nursing

Introduction

The *Registered Nurses Education in Canada Statistics* report is a product of the *National Student and Faculty Survey of Canadian Schools of Nursing (NSFS)*, and it is the only longitudinal national collection of nursing education data in Canada. The report includes entry-to-practice education programs for registered nurses (RNs), as well as master's and doctoral nursing programs and programs for nurse practitioners (NPs). Data have been collected on RN students and faculty since 1963.

National Student and Faculty Survey of Canadian Schools of Nursing (NSFS)

The *Registered Nurses Education in Canada Statistics* report of the NSFS focuses on two main elements: programs and faculty. Program elements provide data about the number of students admitted, enrolled, and graduating from nursing programs; the types of programs offered; and the approaches to program delivery. Faculty elements include numbers of faculty, types of faculty, their employment status, level of education attained and in progress, age cohort, and information on recruitment and retirement.

This publication provides an analytical report of the 2022–2023 data collected from the RN and NP portions of the NSFS. The key program findings are presented for 2022–2023, followed by the key RN faculty findings for 2023. The detailed 2022–2023 results are then presented. The results include data from the survey as well as data obtained from the Ordre des infirmières et infirmiers du Québec (OIIQ), added to offset survey under-reporting of admission and graduate data for Quebec's entry-to-practice diploma programs. The inclusion of the OIIQ data, in combination with the results of the NSFS, permits a pan-Canadian analysis.

Note: In order to ensure clarity, the OIIQ data are used for both the admissions and graduate data points for entry to practice in all sections of this report.

Survey Distribution and Response

The 2022–2023 NSFS survey was issued to all 137 schools of nursing in Canada offering entry-to-practice (ETP) pre-licensure education (entitling successful graduates to apply for initial licensure/registration as an RN), post-RN licensure baccalaureate programs, NP education, and/or graduate RN education.

Of the 137 schools, 96 schools completed the survey, including 90 of a possible 95 CASN members. Of the 96 schools, six were CÉGEPs. The overall survey response rate was 70.1%; the CASN member response rate was 94.7%. See the tables starting on page 23 for more detailed information about omitted or unusable data. On average, 69.0% of schools responded to the faculty questions.

Data Comparison Time Frames

Program inventory, admission, and enrolment data were collected for the 2022–2023 academic year. Unless otherwise stated, increases or decreases noted in the report are in relation to 2021–2022 data.

Graduate data were collected for calendar year 2023. Unless otherwise stated, increases or decreases noted in the 2023 data are in relation to the 2022 survey data.

Faculty data were also collected for calendar year 2023. Unless otherwise stated, comparisons of faculty data with previous results are in relation to 2022 data.

Data are unavailable for some tables for 2018–2019 and 2019 because of a low response rate due to the COVID-19 pandemic.

Survey Methodology

See the Appendix for methodological information.

2022–2023 Key Program Findings

This section of the report highlights key findings regarding education programs in 2022–2023. It reveals trends related to the numbers of new graduates being prepared to enter the workforce as well as the modalities and educational level of the program they are enrolled in across the country.

Entry-to-Practice Programs

Entry-to-practice (ETP) programs entitle the successful graduate to apply for initial licensure/registration as an RN.

- All 96 schools (100%) offered an ETP program.
- 88 of the 96 schools (91.7%) offered ETP baccalaureate programs.
- ETP baccalaureate programs were offered in every province and territory except for the Yukon, where no RN education programs exist.
- 37 colleges partnered with a university to deliver ETP baccalaureate programs; two colleges in British Columbia, one college in Manitoba, and two colleges in Ontario granted ETP baccalaureate degrees autonomously.

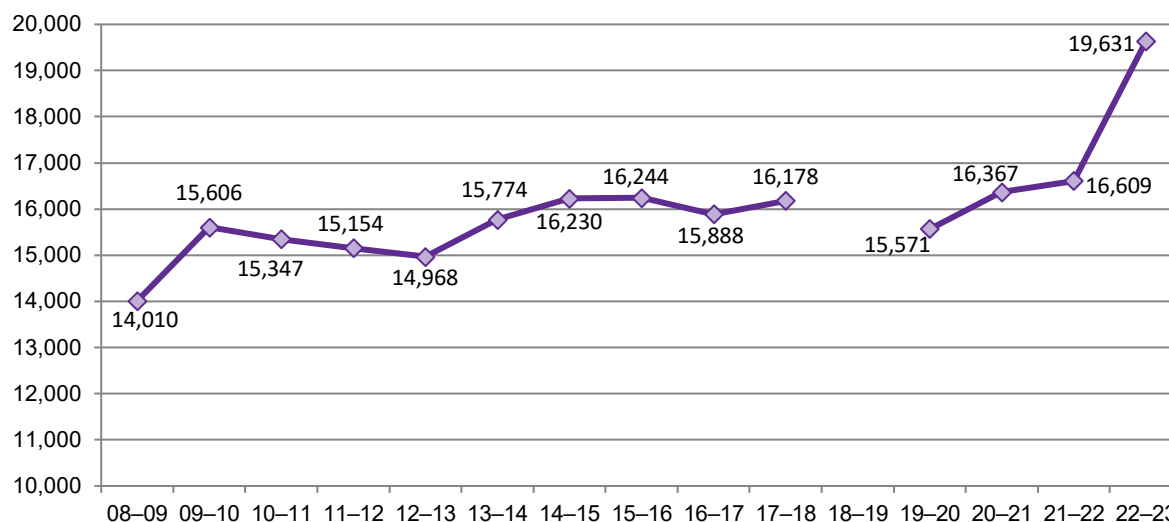

Program inventory and admissions are 2022–2023 data as compared with 2021–2022 data.

ETP Admissions

- 19,631 students entered ETP programs in 2022–2023, an increase of 18.2% (from 16,609) (Figure A).

Figure A

Admissions to Entry-to-Practice Programs, 2008–2009 to 2022–2023

Note. Data for the following years include small changes due to corrections submitted from OIIQ and schools: 2019–2020, 2020–2021, and 2021–2022. Practical nurse to registered nurse bridging programs were not included in the 2021–2022 survey year due to a change in survey structure.

Sources: *National Student and Faculty Survey of Canadian Schools of Nursing*; *Ordre des infirmières et infirmiers du Québec*.

ETP Graduates

- The number of graduates increased in 2023 to 11,923, a 4.8% increase compared with 2022 (11,379).

Figure B

Graduates From Entry-to-Practice Programs, 1963 to 2023

Note. Data for the following years include small changes due to corrections submitted from OIIQ and schools: 2020, 2021, and 2022. Practical nurse to registered nurse bridging programs were not included in the 2022 survey year due to a change in survey structure.

Post-RN Programs

- 16.7% of schools (16 of 96 schools) offered one or more post-RN baccalaureate programs for diploma-trained nurses wishing to obtain a baccalaureate degree in nursing or nursing science.
- Post-RN programs were not reported by Newfoundland and Labrador, Prince Edward Island, New Brunswick, Saskatchewan, the Northwest Territories, Nunavut, or the Yukon.
- 2,020 diploma-trained RNs graduated from post-RN baccalaureate programs in 2023, representing a 32.2% increase from 2022 (Figure C).

Figure C

Graduates From Post-RN Baccalaureate Programs, 2013 to 2023

Source: *National Student and Faculty Survey of Canadian Schools of Nursing.*

Master's and Doctoral Programs

- 37.5% of schools (36 of 96 schools) offered one or more master's programs; master's programs were not available in the Northwest Territories, Nunavut, or the Yukon.
- 20.8% of schools (20 of 96 schools) offered doctoral programs in 2022–2023.
- 1,013 students were admitted to master's programs, a 15.4% increase since 2021–2022 (Figure D).
- 897 RNs graduated from master's programs, a 4.9% increase from 2022 (Figure E).
- Admissions to doctoral programs increased by 59.5% from 2021–2022 (Figure D).
- The total number of graduates from doctoral programs was 79 graduates in 2023 as compared with 73 in 2022, an increase of 8.2% (Figure E).

Figure D

Admissions to Master's and Doctoral Programs, 2018–2019 to 2022–2023

Note. Data for the 2021–2022 year include small changes due to corrections submitted from a school in Ontario. Doctor of nursing programs were not included in the 2021–2022 survey year due to a change in survey structure.

Nurse Practitioner Programs

Nurse practitioner (NP) programs are offered at two educational levels: master's and post-master's.

- 30.2% of schools (29 of 96 schools) offered one or more NP programs.
- NP programs were reported in all provinces and territories, except for the Northwest Territories, Nunavut, and the Yukon.
- The number of students admitted to NP programs decreased 2.2% in 2022–2023, with 927 students entering a variety of NP programs (Figure F).
- Graduate levels for NP programs increased by 10.3% in 2023, with 892 graduates in 2023 as compared with 809 in 2022. (Figure G).

Approaches to Program Delivery

Accelerated or Compressed ETP Programs

Accelerated or compressed ETP programs allow students to complete an ETP baccalaureate degree in under 4 years. To do so, these programs offer courses throughout the spring and summer months and admit students who have already completed some of the program requirements, typically some of the foundational non-nursing course requirements. A variety of fast-track ETP programs are being offered, including those identified as *accelerated*, *fast-track*, *compressed*, *second-degree entry*, *advanced entry*, and *bridging* programs.

Note: The usual ETP baccalaureate program duration of 4 years may not be the standard program length for all ETP baccalaureate programs in Quebec. As a result, Quebec ETP programs are not counted as fast-tracked unless the school identifies the program as such.

- 25.0% of schools (24 of 96 schools) offered one or more ETP accelerated programs in 2022–2023 (Table B).

Table B

Number of Schools Offering Accelerated Entry-to-Practice Programs by Jurisdiction, 2022–2023

Distance Education Options

For the purposes of this report, distance education (DE) is used to describe programs offered wholly electronically or in a blended model that incorporates online and face-to-face delivery.

- 40.1% of all programs (93 of 232 programs) used some form of DE (Table C).
- Some DE delivery was used in 65.6% of all NP programs and in 63.2% of master's programs. Of Canada's 23 doctoral (PhD and DN) programs, 56.2% used some DE options.

Table C

Number and Types of Programs Using Some Distance Education by Jurisdiction, 2022–2023

Jurisdiction	ETP baccalaureate	Post-RN baccalaureate	Master's	Doctoral	NP	Total all programs
Newfoundland and Labrador	2	...	1	...	1	3
Prince Edward Island
Nova Scotia	2	1	1	1	1	5

2023 Key RN Faculty Findings

The supply of RN faculty is a major factor affecting the capacity of programs to educate nurses (Med-Emerg, 2006). It is influenced by retirement of existing faculty, the inflow of newly prepared faculty, and variables such as the ability to attract and retain qualified faculty.

RN or nursing faculty encompasses different types of nursing educators. For the purposes of this report:

- *permanent faculty* refers to permanent full-time or part-time faculty who teach nursing courses;
- *long-term contract faculty* refers to contract faculty who hold contracts of one academic year or longer who teach nursing courses;
- *short-term contract faculty* refers to faculty who hold contracts of less than one academic year who teach nursing courses; and
- *RN faculty* and *faculty* refer to all of the above.

RN Faculty Demographics

- 8,943 RN faculty members were employed by schools of nursing in 2023.
- Only 30.2% of faculty members are permanent: 2,699 of the 8,943 RN faculty (Table D).
- 47.2% of permanent faculty were 50 years of age or older; 17.6% were 60 years of age or older (Table E).
- RN faculty are older than the general RN workforce, with the percentage of RN permanent faculty in the 50+ age cohort 44.1% higher than the percentage of RNs in the 50+ age cohort in the RN workforce (Table E).
- A decreasing percentage of RN permanent faculty were in the 50+ age cohort (Table F). This portion of the permanent faculty population has been decreasing slightly over the last 5 years, which demonstrates that permanent faculty are generally younger than in previous years.

Faculty data are 2023 data as compared with 2022 data.

The response rate for the question about age cohorts was 70.5% (67 of 95 schools). The response rate for the questions about employment status was 64.2% (88 of 137 schools).

Note: Questions that indicate a response rate from the 95 schools do not include data from schools that offer only an RN ETP diploma program.

Table D

Number of Faculty by Employment Status, 2023

Faculty category	Number of faculty	% of faculty workforce
Permanent faculty	2,699*	30.2
Long-term contract faculty	500*	5.6
Short-term contract faculty	5,744	64.2
Total faculty workforce	8,943	100.0

*See tables 10 and 14

Source: *National Student and Faculty Survey of Canadian Schools of Nursing*.

Table E

Age Category Percentages for 2023 RN Workforce Compared to 2023 RN Permanent Faculty

Age category	% of RN workforce, 2023	% of RN permanent faculty, 2023
<40	46.5	16.4
40–49	23.0	36.4
50–59	19.7	30.0
60+	10.7	17.6

Note. RN workforce percentages do not add to 100 due to “unstated.” The RN workforce data are the most recent available at the time of publication.

Sources: *National Student and Faculty Survey of Canadian Schools of Nursing*; Canadian Institute for Health Information (2024).

Table F

Comparison of RN Permanent Faculty Age Cohorts, 2019 to 2023

Age cohort	2019	2020	2021	2022	2023	% change 2022 to 2023
<40	..	15.2	20.4	16.9	16.4	–3.0
40–49	..	32.5	29.6	32.3	36.4	12.7
50–59	..	32.4	30.4	32.9	30.0	–8.8
60+	..	19.9	19.6	19.9	17.6	–11.6

.. Figure not available

RN Faculty Recruitment and Retirement

The data collected on questions concerning faculty recruitment and retirement have implications for future faculty supply, particularly when examined in relation to the numbers of current enrolments in graduate programs.

- 77 permanent RN faculty retired in 2023.
- 10.4% (8 of the 77) were under age 60.
- 73 permanent RN faculty left for reasons other than retirement.
- 17.6% of permanent RN faculty aged 60 or older were eligible to retire (Table F).
- Schools were unable to fill 45 permanent positions. This is a decrease from 58 unfilled positions in 2022. See Table E for full-time faculty count.
- Schools projected a need to hire 310 permanent and long-term contract faculty in 2023 (Table G), a decrease from 425 in 2022.

Table G

Full-Time RN Faculty Hiring Projections for 2023

	Canada	NL	PE	NS	NB	QC	ON	MB	SK	AB	BC	NT	NU	YT
Permanent faculty, # of hires projected	200	3	..	9	4	11	47	14	38	32	41	*	*	...
Long-term contract faculty, # of hires projected	110	3	..	3	5	7	23	8	0	27	29	*	*	...

* Value suppressed in accordance with CASN privacy policy; cell value is between 1 and 4, or value suppressed to ensure confidentiality; cell value is 5 or greater

.. Figure not available

... Figure not appropriate or not applicable

Source: *National Student and Faculty Survey of Canadian Schools of Nursing.*

The response rate for the question about recruitment projections of full-time faculty was 78.9% (75 of 95 schools). The response rate for the question about actual retirement of permanent faculty was 69.5% (66 of 95 schools).

RN Faculty Academic Upgrading

- 7.4% of permanent and long-term contract faculty RN faculty (237 faculty members) were engaged in academic upgrading programs ranging from baccalaureate to post-doctoral studies. These studies took place in schools in and outside of Canada (Table H).
- The majority of faculty who were upgrading educational qualifications were enrolled in master's (36.7%) or doctoral (55.7%) programs.

The response rate for the question about the number of full-time faculty engaged in academic upgrading was 72.6% (69 of 95 schools).

Table H

Full-Time Faculty Engaged in Academic Upgrading, 2023

	Permanent		Long-term contract		Total
	In Canada	Outside Canada	In Canada	Outside Canada	
Baccalaureate degree in nursing	0	0	0	0	0
Baccalaureate degree in other discipline	0	0	0	0	0
Master's degree in nursing	42	6	26	0	74
Master's degree in other discipline	9	2	2	0	13
Doctoral degree in nursing	74	4	16	0	94
Doctoral degree in other discipline	31	1	5	1	38
NP (master's or post-master's)	6	0	3	0	9
Post-doctoral study in nursing	6	1	0	0	7
Post-doctoral study in other discipline	1	1	0	0	2

Source: *National Student and Faculty Survey of Canadian Schools of Nursing.*

Number of RN Faculty and Type of RN Faculty Contracts in Place

- Schools employed 8,943 faculty members (Table D).
- 30.2% of the faculty held permanent positions (Table D).
- 5.6% of faculty held contracts of one academic year or longer (Table D).
- 64.3% of the faculty currently teaching in nursing programs were employed in a short-term contract capacity (Table D).

The response rate for the two questions concerning the number of contracts in place was 64.2% (88 of 137 schools).

Number of RN Faculty on Leave

The survey question concerning faculty leave captures the number of permanent faculty on any school-approved leave of absence. An approved leave includes, but is not restricted to, parental leave, sick leave, compassionate leave, and sabbatical leave.

- 7.3% of permanent faculty (198 members) were on leave (Table I).

The response rate for the question about number of permanent faculty on leave was 64.2% (61 of 95 schools).

Table I

Full-Time Permanent RN Faculty on Leave, 2023

	Canada	NL	PE	NS	NB	QC	ON	MB	SK	AB	BC	NT	NU	YT

Faculty Recruitment Factors

Schools were asked to identify factors that affect their ability to recruit full-time faculty. The data reveal many shared experiences across geographic location; when the data are broken down by region, however, similarities emerge in the factors reported in Northern and rural areas.

Factors in Northern and Rural Areas

Schools in Northern and rural areas reported that the biggest factors limiting their ability to recruit faculty were:

- lack of NP, master’s, and doctorally prepared candidates;
- lower salaries and fewer benefits; and
- remote location and small community size.

Pan-Canadian Recruitment Factors

Schools across Canada identified similar factors as a challenge limiting their ability to recruit new faculty. The three main concerns are presented in Table J. Also noted was the lack of applicants with sufficient proficiency in both official languages and with Indigenous knowledge or other specialties.

While a shortage of doctorally prepared nurses applying to open positions was frequently noted, schools in rural and smaller urban areas and those from provinces without doctoral programs were more likely to report this issue. Competition between colleges and universities to attract faculty was also noted.

Table J

Recruitment Factors, 2023

Recruitment factors	% of respondents reporting factor
Lower salaries and fewer benefits for faculty, especially as compared with salaries available in practice settings	40.6
A shortage of nurse practitioner, master’s, and doctorally prepared nurses seeking academic positions	39.1
Location: Low attraction to Northern and rural locations or high cost of living in metropolitan areas	36.2
Competition with other sectors and schools	20.3
No issues recruiting faculty	13.0

Source: *National Student and Faculty Survey of Canadian Schools of Nursing*.

The response rate for the question about issues affecting the recruitment of full-time faculty was 72.6% (69 of 95 schools).

Summary of Key Program and RN Faculty Findings

- The number of graduates from ETP programs increased in 2023 to 11,923, a 4.8% increase compared with 2022 (11,379).
- Admissions increased in 2022–2023; 19,631 students entered ETP programs, an increase of 18.2% from 16,609 in 2021–2022.
- 33.8% of all programs reported using some distance education delivery, which may be improving student access.
- Increased graduate program admissions need to be sustained to avoid a potential faculty shortage as the following data indicate:
 - 47.2% of faculty were in the 50+ age cohort.
 - 17.6% of faculty were in the 60+ age cohort.
 - 77 permanent faculty retired in 2023.
 - There were 79 graduates from doctoral (PhD and DN) programs in 2023.
 - Currently, there are 613 students enrolled in doctoral nursing programs in Canada, at least 110 of whom are current faculty members. The potential future supply of new faculty from current doctoral enrolment in Canada is therefore 503.

2022–2023 Results

The 2022–2023 survey was issued to the 137 schools of nursing offering ETP pre-licensure education entitling successful graduates to apply for initial licensure/registration as an RN or for post-RN, NP, and graduate RN education. It was completed by 96 schools, including 90 of a possible 95 CASN members.

The overall survey response rate was 70.1%; the CASN member response rate was 94.7%. See the tables starting on page 23 for more detailed information about omitted or unusable data. On average, 69.0% of schools responded to the faculty questions.

Different collection periods and methodologies and under-reporting from a small proportion of schools may result in differences between the records of a provincial or territorial government or regulatory body and the data from the *National Student and Faculty Survey of Canadian Schools of Nursing*.

The following tables represent data as reported by each of the participating schools and do not include data from other sources. CASN is not responsible for errors in data reported by schools.

Note: In order to ensure clarity, the OIIQ data are used for both the admissions and graduate data points for ETP in all sections of this report.

It is important to read the notes that accompany each table as well as the section “Methodological Notes” on page 57, which contains information pertinent to all of the tables. The full survey methodology and definitions are in the Appendix.

Table 1

Education Programs by Province and Territory – Schools Offering Diploma, Undergraduate, and Graduate Programs, 2022–2023, by Program Category

Baccalaureate collaborative partnerships are shown by indenting the name of the partner school under that of the degree-granting institution.

Notes

- OIIQ data 2022–2023: 3,869 students were admitted to diploma programs and 754 to baccalaureate programs; 2,041 students graduated from diploma programs and 597 from baccalaureate programs. Enrolment numbers are supplied directly from the schools.
- Totals may not add up to 100 due to rounding.
- The admission number was used for applications as well where the application number was not provided by schools.
- While individual students are counted in admissions, enrolment, and graduates, applications are counted by number received and so are higher than the number of individuals submitting applications.

Methodological Notes – Survey Tables

Classification of nursing programs

Programs are identified by a standard data code, which allows the RN education data to be attributed to one of six program categories.

Diploma	Diploma, diploma exit option, PN to RN, LPN to RN, and DEC
PN-to-RN Bridging	Practical nurse to registered nurse bridging
Baccalaureate	Standard, generic, collaborative, accelerated, fast track, advanced, second-degree entry, compressed,
Post-RN	Post-RN baccalaureate, DEC-BACC
Master’s	Master of nursing, DESS
PhD	PhD in Nursing
Doctor of Nursing	Doctor of nursing, doctor of nursing practice
Nurse practitioner	Nurse practitioner, NP integrated with a degree program (e.g., MN/NP)*

*NP programs may be combined with or integrated into master’s degree programs, and schools may or may not report separate data for these integrated programs. Where the data are reported separately, they are recorded under the NP program.

Collection Period

Program inventory, admission, and enrolment data are collected on the academic year. This year’s collection is for the 2022–2023 academic year.

Graduate and faculty data are collected on the calendar year. This year’s collection captures these data for calendar year 2023.

Data Collection Terms

Admission	<p>Admission results are calculated by totalling the number of first-time nursing students admitted to Year 1 of the program plus the number of advanced entrant students admitted in any year of the program.</p> <p>Admission results include data for each intake offered throughout the course of an academic year.</p> <p>Schools are asked to report admission results <i>after the allowed withdrawal date</i> of their institution.</p>
Enrolment	<p>Enrolment results are a count of the number of students enrolled in each year of study.</p> <p>Enrolment results include data for each intake offered throughout the course of an academic year.</p> <p>Schools are asked to report enrolment results <i>after the allowed withdrawal date</i> of their institution.</p>

ETP programs	Entry-to-practice (RN-ETP) programs entitle the successful graduate to apply for licensure/registration. RN-ETP programs include diploma, generic baccalaureate, practical nurse to registered nurse bridging programs, and entry-to-practice master’s programs.
Graduates	Graduate results are calculated by totalling the number of degrees awarded by each institution throughout a calendar year.

See the Appendix for a list of the definitions provided to all schools.

Data Limitations

Data included in the survey tables are as reported by the schools that responded to the survey. See “Survey Response” below for details on annual response rates.

Schools sometimes provide data that are unusable or fail to report requested data. Each table is accompanied by a summary of omitted data.

While CASN reviews each school’s submission and follows up when unusual fluctuations are noted, there is the potential for some under- or over-reporting.

Out-of-Province/Territory Partnerships

Colleges and universities may establish program delivery partnerships that cross provincial or territorial boundaries. In 2007, the treatment of graduate data from program delivery partnerships that cross provincial or territorial boundaries was amended so that graduate results would be recorded in the student’s home province or territory. Admission and enrolment data continue to be recorded according to the program delivery responsibility of each partner. The handling of admission and enrolment data did not change. Historical graduate data have been adjusted accordingly. Please see “Survey Methodology” for additional details.

Out-of-province/territory baccalaureate collaborative partnerships as of 2022–2023 include: Aurora College (NT), partnered with the University of Victoria (BC); and Nunavut Arctic College (NU), partnered with Dalhousie University (NS).

Survey Response

2018–2019: Information unavailable due to COVID-19 pandemic.

2019–2020: The survey was issued to the 136 schools of nursing offering programs; 97 schools completed the survey; **the overall survey response rate was 71.3%**; the CASN member response rate was 89.0%. On average, 73.1% of schools responded to the faculty questions.

2020–2021: The survey was issued to the 137 schools of nursing offering programs; 99 schools completed the survey; **the overall survey response rate was 72.3%**; the CASN member response rate was 96.8%. On average, 82.3% of schools responded to the faculty questions.

2021–2022: The survey was issued to the 137 schools of nursing offering programs; 100 schools completed the survey; **the overall survey response rate was 73.0%**; the CASN member response rate was 98.9%. On average, 83.9% of schools responded to the faculty questions.

2022–2023: The survey was issued to the 137 schools of nursing offering programs; 96 schools completed the survey; **the overall survey response rate was 70.1%**; the CASN member response rate was 94.7%. See the tables starting on page 23 for more detailed information

about omitted or unusable data. On average, 69.0% of schools responded to the faculty questions.

Privacy and Confidentiality

In accordance CASN's privacy policies, some small cell entries between 1 and 4 are not reported. Some cell values of 5 or greater have also been suppressed to protect confidentiality.

Appendix

National Student and Faculty Survey of Canadian Schools of Nursing 2022–2023: Survey Methodology

General Methodology

Background

The Canadian Nurses Association (CNA) began administering an annual survey on nursing students and faculty in 1963. In 2001, a new survey and methodology were developed for CNA by well-known statistician Eva Ryten. The Canadian Association of Schools of Nursing (CASN) led the development of the faculty questions that same year. CASN member schools tested the new survey prior to its initial distribution in 2002. Throughout the partnership, CNA and CASN have introduced changes to the survey to reflect changes in program delivery and to increase data related to faculty. CASN took over full administration of the survey in 2013.

In the mid-1990s, provinces and territories moved to phase out college diploma programs and convert all new nurse supply education programs to undergraduate degree programs. Conversion to degree programs is complete in all provinces and territories except Quebec. In 2010, a final intake of diploma students took place at two schools in Manitoba. The Northwest Territories and Nunavut converted to degree programs in 2010. Quebec continues to provide diploma programs while supporting the development of baccalaureate partnerships between CÉGEPs/colleges and universities. The Yukon has no entry-level educational programs.

The following table shows the different stages of the transition from diploma entry-level to baccalaureate entry-level education.

Entry-to-Practice Education Requirements for Registered Nurses

Jurisdiction	Target year; status
Prince Edward Island, Newfoundland and Labrador, New Brunswick, Nova Scotia	1998; completed
Saskatchewan	2000; completed
Ontario	2005; completed
British Columbia	2006; completed
Alberta	2009; completed
Northwest Territories, Nunavut	2010; completed
Manitoba	2013; completed
Quebec	Quebec continues to offer diploma programs while supporting the development of baccalaureate partnerships between Collèges d'enseignement général et professionnel (CÉGEPs) and universities.
Yukon	The Yukon has no entry-level educational programs.

The conversion from diploma to degree programs brought in its wake many statistical complications. The mechanism adopted to convert from diploma to degree programs was the introduction of collaborative degree programs. *Collaborative* refers to a relationship of cooperation between a university and one or more college-level institutions. The extent and type of collaboration models existing between a university and its collaborating partner or

partners vary greatly. For example, the university may be responsible only for ensuring that the curriculum meets university degree standards, and the college may deliver the entire curriculum on its sites. Alternatively, the university may be heavily involved not only in approving academic standards but also in delivering sizable amounts of the curriculum on its campuses.

A data record linking process permits admission and enrolment data of programs delivered under a collaborative model to be linked to the graduate program data of the degree-granting partner. This approach allows for the statistical tracking of nursing students by qualification earned from the point of admission, by each year of enrolment, through to graduation. It also accommodates recent changes whereby some colleges now award baccalaureate degrees or have changed their institution type from college to university. Historical results have not been affected by these changes.

Data Collection

The survey requests information on the following:

- **Program inventory** covers all nursing programs leading to initial licensure (e.g., diploma, diploma exit, baccalaureate, collaborative baccalaureate) as well as formal programs furthering an RN's education (e.g., post-RN, master's, doctorate, NP); includes distance education programs, multiple language offerings and multiple partnership arrangements. Collection period: academic year.
- **Graduates** by qualification earned, graduates by gender for each program listed in the program inventory, by partner, by site, where available. Collection period: calendar year.
- **Faculty demographics** details on faculty responsible for the delivery of programs listed in the program inventory, by gender, contract type, rank, and status; these data include components such as highest academic credential, age cohorts, faculty on leave, average age of retirement, attrition other than retirement, and additional information on classroom ratios. Collection period: calendar year.

Admission and enrolment data are collected for the previous academic year to ensure that fall, winter, and summer intake data are gathered. Graduate data are collected for the calendar year to align with annual licensing examination practices and health human resources planning. Admission and enrolment data are counted only after the school's allowed withdrawal date.

The data are completed by the appropriate designate at each school and are reviewed and approved by the dean, director, program head, or equivalent. On receipt, the data are reviewed by CASN to ensure that all programs, sites, partners, and data elements have been included. Comparisons are made to program inventories from previous years as well as program data listed on each school website to ensure that data are representative of all programs offered by the school.

Disparities are resolved by the CASN program lead and the school staff responsible for the data compiled. The dean, director, program head, or equivalent validates the data's accuracy and completeness, and approves the use of the data to prepare reports and to support research and policy decisions affecting the future supply of nurses in Canada.

When data are not reported, the omitted data are sorted by data type and captured in one of two categories: (1) not available, or (2) not appropriate or applicable. Omitted data are identified in the reports.

In 2009, an online version of the survey was made available to CASN members, and a paper version was provided to CÉGEPs and non-CASN members. From 2015 to 2019, the online survey was available to all schools except CÉGEPs. Starting with the 2019–2020 survey year, all schools were given the online survey.

The 2022–2023 survey data were collected using Qualtrics (www.qualtrics.com).

Data Organization

The data derived from the survey accommodate the increasing variety and complexity of nursing education models in Canada, including NP education models. The data are organized to allow for statistical trends to be tracked at provincial or territorial and national levels by qualification earned.

Another component of data organization accommodates the increasing variety of NP programs. NP programs may be combined with or integrated into master's degree programs, and schools may report separate data for these integrated programs. In these instances, data are recorded under the NP program. If the school is unable to provide the data separately (e.g., some integrated programs are reported such that all admission, enrolment, and/or graduate data are included in the master's program), then all the data are included under the master's program.

Links are established between partners offering collaborative baccalaureate programs such that admission, enrolment, and graduate data records mirror the delivery of each partner. A baccalaureate program is attributed to each partner offering a part of the baccalaureate program. This approach allows for the statistical tracking of nursing students by qualification earned from the point of admission, by each year of enrolment, at each partner site through to graduation. It also accommodates recent changes whereby some colleges now award baccalaureate degrees or have changed their institution type from college to university. Historical results have not been affected by these changes.

Colleges and universities may establish program delivery partnerships that cross provincial or territorial boundaries. In 2007, the treatment of graduate data from program delivery partnerships that cross provincial or territorial boundaries was amended so that graduate results would be recorded in the student's home province or territory. Admission and enrolment data continue to be recorded according to the program delivery responsibility of each partner. The handling of admission and enrolment data did not change. Historical graduate data have been adjusted accordingly. Please see "Survey Methodology" for additional details.

Tables

The survey data are summarized in 19 tables for distribution to schools of nursing and interested parties (e.g., CASN member schools, researchers, government departments). Each table contains important notes covering data scope, updates to previous years' data, omissions, and acknowledgements.

It is important to review the program names included in each of the program categories listed in the various tables. Equally important is an understanding of the approach taken to collaborative baccalaureate programs, data pertaining to NP programs and partnerships outside provincial or territorial boundaries. See the section "Background" for information on this point as well as "Data Organization." A review of the definitions used in the survey, in the next section, is also recommended.

Data Confidentiality and Privacy

As part of the 2022–2023 survey submission procedures, each school completed a confidentiality and approval release form authorizing CASN to release the data for purposes of research, policy-making, advocacy, etc.

CASN staff adheres to CASN’s privacy policy, available on the CASN website.

Definitions Used in the Survey

Advanced entrants (counted as of the school’s allowed withdrawal date)

Students previously enrolled in a non-nursing program (e.g., bachelor of arts, physiotherapy, and bachelor of science) who transfer to an RN education program. These students have already completed some of the program’s required courses. As a result, they may be approved to join an existing student cohort in Year 2 or Year 3, and so on. Data reported in this selection are included in the calculation of admissions.

Advanced entrants include:

- students previously enrolled in school X in a non-nursing program who transfer to an RN education program in school X;
- students previously enrolled in school Y in a non-nursing program who transfer to an RN education program at school X; and
- students with a degree from a non-nursing program who enter an RN education program.

Note: Advanced entrants differ from first-time students. See the definition *for first-time students*.

Baccalaureate program collaborative delivery

A baccalaureate program offered in partnership between a university and another institution. Program partners may also belong to a consortium.

Baccalaureate program university delivery

A baccalaureate program offered solely by a university; no partners are involved.

Campus site

The school site (campus) where a program is offered.

Continuing students (counted as of the school’s allowed withdrawal date)

Continuing students include:

- full-time students who progress to the next year of study without interruption, remaining with the same student cohort from one year of study to the next;
- part-time students who require more than one academic year to complete all required courses; and
- students who fail a course in a particular year of an RN education program but are permitted to move to Year 2 (policy may vary from one school to another).

Employment status

A description of the employment status of faculty members. Includes permanent, long-term contract, and short-term contracts.

Enrolment (counted as of the school's allowed withdrawal date)

The number of students enrolled in each year of study.

Faculty categories

The categories (i.e., faculty titles) provided may not apply to each school. Schools are encouraged to enter faculty titles in use at their school.

F1 category

Faculty members who are *permanent* who teach nursing courses.

F2 category

Faculty members who are fulfilling time-limited *contracts of one full academic year or longer* who teach nursing courses.

F3 category

Faculty members who are fulfilling time-limited *contracts of less than one full academic year* who teach nursing courses.

First-time students (counted as of the school's allowed withdrawal date)

New entrants to Year 1 of an RN education program. First-time students are found only in Year 1 data. Nursing students who are in Year 2 for the first time are not considered first-time students. Data reported in this selection are included in the calculation of admissions.

Note: First-time students differ from advanced entrants. See the definition of *advanced entrants*.

Intake

The number of times in an academic year when students enter programs. Sometimes *intake* is confused with the number of students admitted.

Program category

Data are recorded in the database according to the following program categories: RN-to-PN bridging programs, baccalaureate programs, post-RN programs, master's programs, PhD programs, DN programs, and NP programs. Each program category may contain multiple programs.

Example: Program category *post-RN*: the school may offer a post-RN program on-site as well as a post-RN program via distance. Both programs are listed under program category post-RN.

Program duration

The expected number of years/semesters required to complete the entire program based on full-time program delivery.

Qualification

The name of the credential awarded upon successful completion of a program (e.g., BN, BScN, MN).
