Education Management Solutions

SIMULATIONiQ™ CORE **for Healthcare**

Track Skills | Monitor Clinician Capabilities | Reduce Costs

Healthcare institutions need to stay ahead of the curve through faster on-boarding, continuous workforce development, and vigilant adherence to compliance requirements. Education Management Solutions' SIMULATIONiQ™ CORE provides administrators with a cloud-based simulation management solution designed exclusively for health systems to help enhance clinician capabilities, elevate patient care, and generate more return on investment.

SIMULATIONiQ™ CORE

- **A comprehensive simulation** solution without an expansive IT footprint
- **Professional development tracking** aids in overall employee retention
- Effective and easy-to-use tools help **decrease onboarding time**
- Provides **scalability and flexibility** with an option of an add-on mobile unit
- **Extend program reach** with video conferencing and Training in Motion®

SIMULATIONIQ™ CORE FEATURES

Simplify Your Simulation Management

- Easy session and scenario scheduling
- Inventory tracking across all activities

Enhanced Quality Improves Outcomes

- HD recording and live room observation
- Manikin integrations with vitals, events, and bookmarks

Impactful Debriefs and Content Sharing

- Rapid simulation and learner debrief
- Adaptive content management through video editing and permissions-based sharing

Actionable Data

- Robust user tracking, reporting and analytics dashboard for decision making and outcomes
- Universal access via single sign-on
- Secured cloud-based infrastructure
- Automated backup of all video recordings

Responsive Support

- Comprehensive onboarding, user training, and migration assistance
- TotalCAREiQ™ plans available for post sales service and support

SIMULATION iQ™ CORE

HOW DOES SIMULATIONiQ™ CORE INTEGRATE WITH MODERN HEALTH SYSTEMS?

SIMULATIONiQ™ CORE is the ideal turnkey solution for clinical simulation training of any type to schedule, record, debrief, and assess clinical capabilities. Additionally, CORE's interoperability with other systems allows administrators to extend their training with support for on-site and in-situ scenarios.
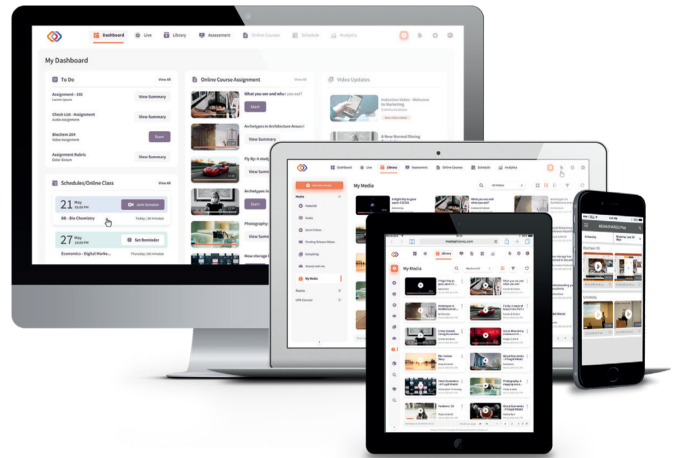

Cost-Effective Onboarding and Professional Developments

SIMULATIONiQ™ CORE's **cloud-based solutions** feature the power of enterprise level platforms without the additional cost of traditional on-site IT hardware. And with its support of **video sharing and remote learning**, the lack of need for dedicated physical instruction space helps keep budgets in check.

HD Video Recording of Simulation Rooms

SIMULATIONiQ™ CORE provides **high-definition video recording of simulation rooms,** allowing capture of sessions with superior video quality, enabling detailed analysis and debrief. With **access to archived playback from anywhere,** administrators and professionals can conveniently review and evaluate their sessions at any time, providing maximum flexibility.

Robust User Tracking and Analytics

Informative learner tracking and analytics capabilities allow hospitals to **accurately track simulation sessions, scenarios, and clinical capability activities**. Preset and **customized reports** provide valuable insights for program evaluation, performance improvement, and identifying training needs, helping hospitals optimize their instructional programs and ensure ongoing competency and workforce development.

SIMULATIONIQ™ CORE USE CASES SCENARIOS

Train at Multiple Locations – Deploy standardized training catering to multiple locations with the capability to expand when needed.

Conduct Training Across Multiple Rooms – Seamlessly integrates with existing system architectures to capture, manage, schedule and organize simulation training program across several rooms.

SIMULATION iQ™ CORE

Advanced technology to support clinical capability assessment and simulation training for healthcare workforce development.
