

SIMULATIONiQ™ for Healthcare Enterprise

Cloud and On-Premises Solutions | Generate ROI | Reduce Costs

Education Management Solutions' (EMS) SIMULATIONiQ™ Enterprise directly addresses the challenges of efficient onboarding, continuing professional development, and training standardization through enhanced simulation management.

Beyond the basic offerings of most simulation hardware and software platforms, EMS simulation solutions offer robust on-premises or cloud-based platforms uniquely tailored to the demanding requirements of modern health systems while still providing a maximum return of investment on workforce development initiatives.

EMS'S SIMULATIONiQ™ ENTERPRISE

- Automated simulation management reduces strain on administrators
- Easy-to-use tools enhance training and decrease onboarding time
- Hardware and software agnostic integrations provide maximum flexibility
- Built-in assessment tracking seamlessly documents employee progress

SIMULATIONiQ™ FEATURES

Simplify Your Simulation Management

- Easy session and scenario scheduling
- Integration with video conferencing tools extends training reach
- Interoperability with Competency.AI and EMS apps

Enhanced Quality Improves Outcomes

- HD recording and live room observation
- Manikin integrations with vitals, events, and bookmarks

Actionable Data

- Robust user tracking and analytics dashboard
- Universal access via a single sign-on and simple dashboard view

Impactful Debriefs and Content Sharing

- Enables rapid simulation and learner debriefs
- Easy video editing and permissions-based sharing

Simple Integration

- Seamless integration with a/v and hardware systems
- Extensive LMS compatibility through common LTI standards

Responsive Support

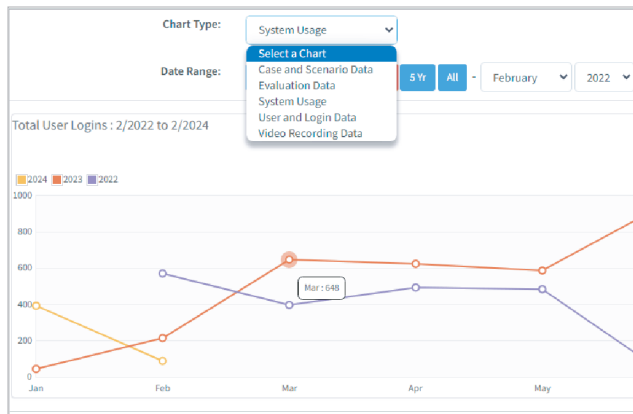

- Comprehensive onboarding and one touch support minimizes downtime
- Systems, staff, and clinicians are fully supported

SIMULATIONiQ™ ENTERPRISE: AN ALL-IN-ONE WORKFORCE DEVELOPMENT SOLUTION FOR CLINICIANS

SIMULATIONiQ™ Enterprise is a premium simulation management solution that delivers unmatched performance for standardized patient and manikin-based training. Whether you're looking to onboard new employees faster, standardize your training, or keep your current staff's skills up to date, SIMULATIONiQ™ Enterprise generates a significant return on investment for workforce development initiatives.

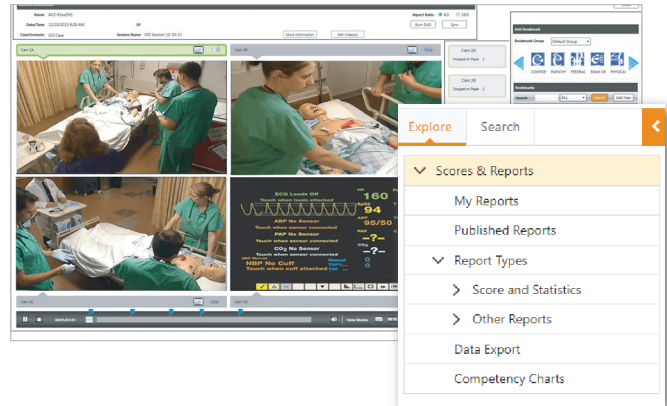

Accelerate Onboarding Time

- Specifically designed to reduce training time and efficiently onboard healthcare staff
- Standardization, flexible and on-demand training, and performance and assessment analysis maximize training efficiency

Reduce Workforce Development Costs

- Enterprise delivers positive ROI by enhancing training quality, optimizing training time, and minimizing the need for redundant training
- Streamline training budgets and ensure practitioners are adequately prepared to deliver high-quality patient care

Improve Patient Care

- Advanced audio and video capture and superior debrief capabilities help enhance professional's clinical skills
- Clinical ability progress tracking features allow healthcare professionals to seek continuous improvement

SIMULATIONiQ™ ENTERPRISE USE CASE SCENARIOS

Ongoing Clinical Skills Training - Facilitates the replication of real-world scenarios to track basic skills for advanced procedures such as intubation or catheterization.

Emergency Response Training - Enables effective simulation-based emergency response training, including mass casualty incidents, code blue, or disaster scenarios.

Continuous Quality Improvement Tracking - Assists in the collection of performance data during simulations, providing valuable insights into areas for improvement, identifying trends, and addressing skill gaps.

Complete on-premises or cloud-based simulation management solution that better prepares healthcare providers and reduces costs.
